

FEB 14

**Cecil
Konijnendijk**

An urban forestry approach to developing liveable and resilient cities

FEB 21

**Larry
Leefers**

Mechanistic modeling of the role of forests and related economic activities in Michigan's economy

FEB 28

**David
Nowak**

Seeing the urban forest for the trees

MAR 14

**Karen
Potter-Witter**

Poplar, parcelization and private forest-land: 30 years of Michigan timber supply research

MAR 28

**Erin
Schliep**

Process driven density-dependent diameter distribution models for forest biomass prediction

APR 4

**Ashley
Keiser**

The interplay between biotic and abiotic controls over litter decomposition processes

APR 18

**Barry
Gardiner**

Wind impacts on tree growth, mechanics and damage

APR 25

**Rachelle
Gould**

Cultural ecosystem services: how do you measure that, especially when "that" may be dynamic?

Hanover Forest Science Seminar Series

Tuesdays | 4:00 p.m. | Room 225: Natural Resources Building
